**NEW IMICHI**

NEW IMICHI is newly designed and made by Special material for durability. This long life New Imichi will release your headache from regular maintenance and replacement spare parts of Imichi.

MIS-FED PREVENTING MECHANISM

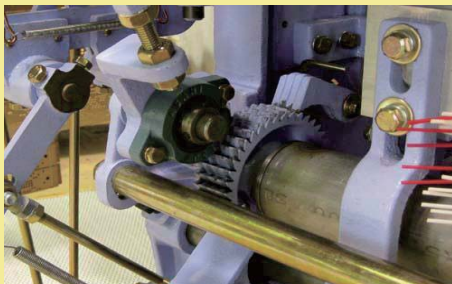

New function of Mis-fed preventing mechanism is added for more selections of Automatic-stop and Non-stop options. You can choose 1-2-4-8 pc pipe stop options depends on the designs.

**NEW SPINDLE NEEDLE GUIDE**

NEW SPINDLE NEEDLE GUIDE can last longer than the previous model and be changed easily only the front part with holes. Durable material is used for long life.

DURABLE RUBBER FOR WINDING ROLL

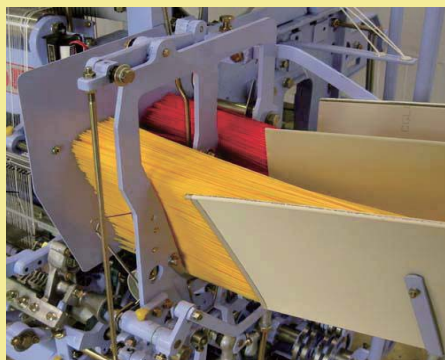

Heat-treated natural rubber is used for WINDING ROLL. This new Winding Roll last longer and not peeling off easily.

**ROTATION TYPE FRONT UNDER PIPE**

FRONT UNDER PIPE is made by stainless steel pipe and can rotate. This mechanism produces better finishing mats. The ratchet pawl have stopper to prevent turned over.

WIDE ARRANGE AUTOMATIC THICKNESS ADJUSTABLE MECHANISM

This device deliver the warp thread constantly to make the mat length even. You can adjust the mat length & thickness from very wide range.

**LARGE FEEDER**

The large size feeder is equipped same as RF-2000. This feeder is made by steel plate for better performance.

YELLOW RUBBER ROLLER

The yellow rubber roller is made by hard material for long life. Center metal core is equipped for low cost replacement of rubber.
